

# EHR Support & Services

CompuTech City provides assistance, support, and consulting for most major EHR systems. In fact, we have implemented over 200 systems in recent years throughout Florida. We have the expertise and capabilities to assist you throughout the selection, implementation, adoption, optimization, and ongoing management phases of your EHR project. Our services include:

## **EHR Sales:**

CompuTech City is pleased to be recognized as the authorized distributor for SuiteMed IMS in Florida. We will be happy to present a customized demo specific to your specialty and support you throughout the sales process.

## **Implementation & Training:**

Technology works best when it works with you. Our highly skilled EHR specialists will custom tailor your training and implementation plans and work alongside you and your team to ensure a smooth implementation and effective, hands on training to ensure you meet your Go Live date and operational expectations. Ongoing Support: Whether you require data conversion for your patient demographics, custom interfaces to other healthcare entities and ancillary care providers, custom configurations, or hardware upgrades to meet evolving EHR technical requirements, CompuTech City has the solution to enable you to maximize your system and its return on your investment.

## **EHR Hosting:**

WFew medical practices want the headaches and increased expenses that come from managing an in-house server for their EHR application. That is why CompuTech City has become Florida's leader in local EHR hosting solutions. With our hosting services designed to support any EHR application, you will benefit from a flat monthly hosting fee; HIPAA compliant processes and security measures; and a 99.999% uptime SLA for bandwidth and power.

## **Meaningful Use & Risk Management:**

Implementing your EHR system is just the beginning. Once you start using it, you need to demonstrate ongoing Meaningful Use of the system to obtain incentive rebates, and to drive long lasting productivity improvements for your staff. Our experienced staff will help you meet your Meaningful Use requirements while also ensuring your compliance with HIPAA and HITECH Act requirements. Adopting EHR presents formidable risks. We can help you minimize the risk and maximize the benefits you can reap from using an EHR system.

## **IT Strategy**

There are a lot of technologies out there and a lot of ways to make your business run more smoothly and at a lower cost. We can help you build a strategy that puts these technologies to work for you. We provide strategic planning and help with emerging technologies.

## **CompuTech City Risk Assessment Model:**

- 1) Paper Audit of Existing Policies & Procedures
- 2) Technical Systems and Network Audit
- 3) Risk Management Interview with Key Staff
- 4) HIPAA Security Rule Onsite Audit
- 5) Formulation of Findings and Recommendations
- 6) Presentation of Findings to Covered Entity
