

PMS Testimonials

"I have been very happy with CompuTech City response time. CTC has completely redesigned our network and assisted us through our entire EMR System implementation. They have monitor and kept our network and server running smoothly ever since we have been with them. We give CTC 10 out of 10."

-Office Manager: Sara Goins, Digestive Disease Consultants

"CompuTech City has always responded quickly to our problems and compared to many other providers is very knowledgeable on how to resolve problems we might be having, due to the fact that they only deal with medical practices. Before we even know of a problem, they contact us letting us know what went wrong and that the problem has been resolved. CompuTech City also helped us migrate to our new EMR System. All-in-all I would recommend CompuTech City to anyone who is looking for a complete medical IT solution provider."

-Office Manager: Ann Pike, Adult Medicine of Lake County

"Choosing CompuTech City was a great move for us. Any time we have a problem they know exactly what the problem is, they notify me when a problem is found, and fix these problems quickly. As for server and network health, since being with CompuTech we have been in wonderful IT health. Our server had crashed a few years back but CompuTech was there to assist us with data recovery and restored our server to full health. We see them as one of the top medical IT providers."

-Office Manager: Leslie Cheney, Center for Digestive Endoscopy

"CompuTech City is good at responding to my problem promptly because, they know my network well and are very knowledgeable. We receive phone calls when a problem is detected or if our backup has failed. We experienced Great performance, when moving our database after we grew out of our old server."

-Office Manager: Eunice Lewis, Winter Park Family Practice

"CompuTech City's unique ability to remove the burdens of managing our IT infrastructure really allows us to focus on improving patient care and growing our practice in a meaningful way."

-Martha Coleman, Practice Administrator, ProHealth Family Physicians

"Your tech team is taking good care of us! Even once when I wasn't here Dana called me, I knew we were in "trouble". I had her call over and someone was here within 15 minutes!!! Our hard drive was going bad. That was as great response!"

-Staci Costa, Practice Administrator, Psychiatric Interventions
