

That Stands Out In A Very Large Crowd

Not all medical billing companies are the same. Few, if any, however, can match the resources and expertise of our Billed Right division. Effective medical billing that generates significant improvements in collection times and first pass acceptance rates (which in turn ensure faster claim settlement times), requires a dedicated team of highly skilled professionals. Do you have a staff ratio of 10 billers to each provider in your practice? If not, then you should consider working with us. We provide you no less than 10 billers to effectively manage your medical billing needs from initial eligibility verification through final account reconciliation and every process in between. Best of all, we work with your existing software allowing you to make the switch with no upfront expenses or the hassles of learning a new Practice Management system?

Don't have a PM system? No worries, we can provide you with one for free.

Medical Transcription

Are you tired of handling your medical transcription needs? Are you looking for a more cost efficient solution than on-staff medical transcriptionists? We offer affordable and easy to implement outsourced transcription solutions perfect for your needs. We offer a HIPAA compliant solution using encrypted 169-bit triple DES.
